Precautions for Use

- 1. Recommended soldering conditions
 - 1.1. Wave soldering

1.2. Recommended Soldering:

Power dissipation of iron should be smaller than 15W and temperature should be controllable. Soldering temperature should be under 230, time 3sec.

- 2. Static Electricity
 - 2.1 Static electricity or surge voltage damages LEDs.It is recommended that a wrist band or an anti-electrostatic glove be used when handling the LEDs.
 - 2.2 All devices, equipment and machinery must be properly grounded. It is recommended that measures be taken against surge voltage to the equipment that mounts the LEDs.
